

## THE EUROPEAN ENVIRONMENT AGENCY

## COMPARATIVE QA/QC REPORT

## Conformity with Natura 2000 Standard Data Form

The list of QA/QC checks performed only covers the most important aspects of data quality, completeness and consistency and should therefore not be considered as being exhaustive.

On the basis of information included in this document, the national authorities are invited to correct and if necessary to resubmit their national databases.

In case of questions please contact: [natura2000.helpdesk@eionet.europa.eu](mailto:natura2000.helpdesk@eionet.europa.eu).

**Country: Luxembourg -- Spatial version: 2024-12-13 -- Descriptive version: 2024-12-13**

## A. Overall consistency of the data

Number of sites	
descriptive	spatial
67	67

## Sites in descriptive version and not in spatial version

None

## Sites in spatial version and not in descriptive version

None

**Sites with different area in SDF and GIS data**

*Sites will be listed in the table below if they fall into any of the following cases:*

- the GIS area is  $\geq 0$  ha and  $< 1$  ha, and the SDF area deviates by  $\geq 0.5$  ha from that value
- the GIS area is  $\geq 1$  ha and  $< 10$  ha, and the SDF area deviates by  $\geq 20\%$  or  $\geq 1$  ha from that value
- the GIS area is  $\geq 10$  ha and  $< 100$  ha, and the SDF area deviates by  $\geq 5\%$  or  $\geq 10$  ha from that value
- the GIS area is  $\geq 100$  ha and  $< 1000$  ha, and the SDF area deviates by  $\geq 2\%$  or  $\geq 20$  ha from that value
- the GIS area is  $\geq 1000$  ha and  $< 10\,000$  ha, and the SDF area deviates by  $\geq 1\%$  or  $\geq 50$  ha from that value
- the GIS area is  $\geq 10\,000$  ha, and the SDF area deviates by  $\geq 0.2\%$  or  $\geq 100$  ha from that value

None

**B. Conformity with Standard Data Form****Sites indicated as 100% marine in their Standard Data forms, but intersecting with the EEA coastline shapefile**

*The following sites, which are defined in section 2.3 of their Standard Data Forms as "100% marine", have been found to be intersecting with the EEA coastline shapefile. Please check whether these sites are indeed 100% marine. In case your national coastline definition shows a different result, you can ignore this message. However, if you confirm that a certain share of the site area is terrestrial, please correct the information in section 2.3 of the Standard data form.*
